

PRODUCT DESCRIPTION

Facing sheet on both sides: PET antireflex perf. 1,8 x 1,8 mm perforations Ø 0,5 mm*

Core: PC -CORE

- AIR-board® acoustic (cell diameter 7 mm)
- big AIR-board® acoustic (cell diameter 12 mm)
- chaos AIR-board® acoustic (cell diameter 4/7/12 mm)

*alternatives: reflective, coated or printed

Our unique bonding technology enables us to combine a rigid translucent honeycomb core with transparent thermoplastic top sheets resulting in a panel with exceptional optical features.

The translucent AIR-board® acoustic panel solves complex tasks. The sandwich element consisting of micro-perforated translucent outer layers and a colourless honeycomb core transmits up to 60% of the ambient light, is a highly effective sound absorber, is characterized by a very low weight with high rigidity and is also flame retardant.

PROPERTIES

- sound-absorbent up to 70%
- innovative translucent optics
- high light transmission with optimum privacy
- low weight
- easy processing
- available with a range of mounting systems

FIELD OF APPLICATIONS

free standing wall | wall covering/suspended ceiling | acoustic image by digital printing and light elements | customized application according to our statement 

CLEANING

The protective foil should be removed after installation is complete. The panels can be cleaned with warm soapy water or a 50% isopropanol solution and a soft lint free cloth. Dust can be removed with antistatic detergent. Cleaning with a dry cloth may lead to surface scratches.
