

# Infinity House

59 Britton Street, London

Architects: Spaced Out Architecture  
Contractor: T & M Building Services  
Products: Topakustik 30/2M  
Finish: American Walnut  
Completed: 2015

## PROJECT INFORMATION

This wonderfully designed project by Spaced Out Architecture incorporates the Topakustik 30/2M in American Walnut.

Installed by T & M Building Services the Topakustik 30/2M planks (absorption class c, NRC 0.75) were manufactured with a moisture resistant core board and finished with an American Walnut veneer.

Due to the environment of projects with spas and swimming pools the core board ensures the integrity of the structure and acoustic performance of the planks.

ACOUSTIC PRODUCT SYSTEM USED

## TOPAKUSTIK® type 30/2 M - data sheet

TOPAKUSTIK® type 30/2 - the filigree profile

This very filigree profile convinces with its fine groove and its good sound absorbing characteristics in spite of its perforation of only 3.5%. Very adequate for offices, living rooms and restaurants

### Planks

Thanks to the precise tongue and groove connection, planks result in an attractive surface with a joint-free appearance, because the connecting joint matches the dimension of the grooves. The planks permit simple and flexible assembly. They can be installed by stapling to a timber batten or clamping to a T-bar with TOPAKUSTIK® clips.
